Figure 9 Ms. Soumya John addressing the participants at the meeting

session. The inaugural session was followed by a Technical Session by Mrs. Asha Kiran, Hazard Analyst, during which she presented the contents and structure of existing DDMP. The session consists of desktop review of DDMP, and the process of DDMP revision. The session was followed by a general discussion session moderated by Ms. Soumya John , District coordinator, Sphere India.

### Key Discussion

- Palakkad is one of the districts that exposed to pesticide hazard, which is commonly used in mango plantations in Attappadi, Muthalmada, Pithalassery regions and not yet recognized by the authorities and the state. It should be noticed and considered as a manmade disaster and took actions accordingly
- Capacity building in DRR for Panchayathiraj institution
- Improper and unscientific method of work plans under MGNREGA scheme cause many environmental issues in this area. Pallavoor to Nenmmara region was flooded severely in last flood. The main cause was considering as the cutting of vegetation in river banks under this scheme.
- All rivers and reservoirs in the district are silted and it is one of the main causes of overflowing of rivers after raining for few hours. Proper desilting of rivers and reservoirs are to be done as soon as possible so that the water bearing capacity of the same will be increased.

## Malappuram

The first level consultation meeting of Civil Society organisations of Malappuram district for DDMP revision was held on 29 October 2019 at conference hall, District Collectorate, Malappuram.
