## Report

As part of the Comprehensive School Safety programme under KSDMA- UNICEF partnership, it was decided to conduct regional training programmes on School Safety at the district level. A total of 200 schools in 14 districts have been selected for the training programme based on the multi hazard zones and 2018 flood affected area. The regional training program on school safety for the Alappuzha and Idukki Districts was conducted on **Saturday, the 1st of February 2020 at District Planning Office, Alappuzha**. The Education department officials and teachers of **Alappuzha and Ernakulam districts** participated. The DDE of Alappuzha district, the DEOs and AEOs of the two districts participated in the training apart from the Headmaster, the focal point teacher of the selected schools. A total of 122 participants attended.

The programme was supposed to be inaugurated by the District Collector. But due to some immediate assignments, she was not able to attend the meeting. Dr. K B Valsalakumari, Former Principal Secretary, Revenue and Disaster Management and Consultant DRR – UNICEF delivered the introductory remarks. Alappuzha DDE delivered felicitations and stressed the need for having school safety action plans in all schools of the district.

The introductory session was followed by a lecture on the Overview of disasters, governance mechanism, legal framework by Dr K B Valsalakumari and a session on School safety, School safety action plan and the roles and responsibilities of different stake holders in school safety activities by Mr. Sinoj Xavier, District programme coordinator, Sphere India. Participants asked questions and clarified their doubts and raised their concerns in the Q & A time which followed.

Everybody actively participated in the sessions clearing their doubts about the implementation of school safety programmes and about the disaster response operations during the floods.

In the post lunch session, participants were divided into 10 groups and were given an exercise wherein each group was given the map of a school with the building plan and they were asked to draw the evacuation route. Most of the groups resulted in submitting and presenting an evacuation route without an assembly point. Dr Valsalakumari reiterated the fact that in all activities related to safer schools, children should be given higher priority. This was followed by an activity where in school safety plan templates submitted by them were reviewed in groups. They shared their concerns and pointed out the mistakes in the submitted reports.

The participants were then asked to write down their evaluation of the workshop. Most of them rated the training as good and very good. In the feedback session some of the teachers pointed out the importance of conducting continuing programmes in order to disseminate the relevance of school safety programmes. Some of them stressed the importance of giving awareness to the LSG representatives, Parent teacher association members etc. More people than we expected attended the workshop and decided to continue the process of building safe school environs.
